SUMMARY

As a **Junior Fullstack Developer** ,I want to work collaboratively with a team to design, develop, and deploy innovative software solutions using backend technologies **Python- Django** and frontend technologies like remix.js react framework, and other modern technologies. I have a strong foundation in data structures, algorithms, and object-oriented programming, which I've applied to solve complex real-world problems efficiently. My experience at previous company has strengthened my ability to adapt to new technologies, follow software development best practices, and contribute effectively within agile teams. With a proactive mindset, strong problem-solving skills, and a passion for continuous learning, I am dedicated to building high-quality, scalable applications that drive impact.

ACHIEVEMENTS

SKILLS

- Proficient in Python with strong understanding of Object-Oriented-Concepts(OOP).
- Proficient in Web Development tools such as HTML , CSS , JS and PHP and Bootstrap
- Knowledge of Backend frameworks (Django,DjangoRestFramework, FastApi)
- Knowledge of database management system(SQL & pSQl).
- Knowledge of Automation and Web Scraping tools like Selenium,

EDUCATION

+2

Trition International College (GPA - 2.9) / Tinkune , Kathmandu / June, 2017 - May, 2019

Major subject - Computer Science

Bachelors

Nagarjuna College of Information and Technology / Sankhamul , Lalitpur / August, 2019 - September, 2024

EXPERIENCE

Python Developer

Nerdplatoon / Sallaghari, Bhaktapur / October, 2024 - October, 2025

Woked as python developer using technologies like Django, Selenium, Pandas and Beautifulsoup for web-scraping and backends. And also on frontend on shopify apps using react framework Remix.js with shopify polaris for ui development .

TRAINING/CERTIFICATION

Beautifulsoup4

- Basic Knowledge of generative AI and AI Agent tools (langchain, langgraph)
- Knowledge of Frontend Frameworks (React framework remix.js)
- Version Control Systems: Git, GitHub, Gitlab
- Knowledge of the shopify app developmen using shopify polaris and remix.js
- Ability to learn new technology fast and efficiently.
- Strong problem solving and analytical skill.
- Excellent communication and teamwork abilities.

LANGUAGE

HTML-5 ,CSS ,Bootstrap, Tailwind

Python-Django, Django-Rest-Framework, FastApi

Langchain, Langgraph

JavaScript , JQuery and AJAX

MYSQL, PostgresSQL

BeautifulSoup-webscraping, Selenium, Python-pandas

React.js , Remix.js, Next.js

Git, Github, Gitlab

Shopify Polaris

PHp

Basic Docker & Github Actions

Python - Django Tutorial

Simplilearn / 2024

In this tutorial offered by simplilearn I learn about the use of Django Framework where I learn how to connect the Templates and StaticFiles like CSS, Js and images to the project and to interact with the database using ORM model provided by the Django.

PROJECTS

NewsApp

This project is developed by using basic fuctionalities of React integrating with the news api to get daily news of the world.

https://github.com/rakeshkarki135/NewsApp_React

Langchain RAG Chatbot Api

This api is created using FastApi with the Ollama as LLM which is interactive RAG chatbot using llama3.1 model .

https://github.com/rakeshkarki135/langchain-RAG

Online Food Ordering

This app is for the online food ordering of the hotel system from where people can order the food through online and made from HTML ,CSS , JS , Bootstrap , Python and Django .

https://github.com/rakeshkarki135/online_food.git

Full Stack Ecommerce

This is the fullstack ecommerce project using remix.js as frontend and Django-DRF as backend with the JWT authentication system including the google and github OAuth service.

https://github.com/rakeshkarki135/Remix-Django-Ecommerce-App

Netflix_clone

This is the netflix clone with additional feature of email verification for registration and forget pasword which is created using HTML, CSS, Bootstrap and Django.

https://github.com/rakeshkarki135/Djnago-Netflix_clone

Full Stack Chat App

This is chat app created using remix.js as frontend and DjangoRestFramework as backend with OAuth authentication for login through github and google and uses websocket for realtime chat with both audio and video call system.

https://github.com/rakeshkarki135/fullstack_chat_app
